

Children and Youth with Acquired Brain Injury (Level 1)

September 29 - 30, 2017

This Certificate Training Program will focus on providing information about behaviours after ABI that relate to learning and community participation. Emphasis is on describing the cognitive-communicative problems that affect classroom learning, behaviour and community participation. Group problem solving activities will develop methods for assessing and treating educational and social challenges for these individuals from a functional perspective. Some topics covered during this training program include:

- Characteristics that impact learning and behaviour
- Environmental scans and communication partners and treatment strategies
- Transitions, functional outcomes and collaborations
